Date” option at the bottom of <https://investors.eto.com/>. Information contained on or accessible through any of the foregoing channels is not incorporated by reference into this press release.

Definitions

Assets under administration (AUA): AUA reflects the aggregate fair value of assets held by users within the platform, including those held by third-party partners for execution or custody services, categorized as follows:

- **Crypto:** Includes all cryptoassets held in eToro digital wallets, Zengo and Bit2C.
- **Equities:** Includes stocks, ETFs, assets managed under the Spaceship program and ISA products.
- **Cash:** Includes customers’ uninvested cash (e.g., cash balances, eMoney balances, in-process cashouts), as well as cash used for margin or posted as collateral for leveraged positions.

Funded Accounts: Funded Accounts are users who have successfully completed the onboarding requirements, activated their account, deposited funds, executed at least one trade, and maintain a positive account balance. For Zengo and Bit2C users, Funded Accounts are defined as users with a positive account balance. Funded Accounts represent the most advanced stage of our user acquisition funnel and are the primary source of commission-generating activity.

Interest Earning Assets: Interest Earning Assets are the average monthly balances of users’ cash balances, corporate cash, users’ total leveraged positions and stakeable cryptoassets.

Total Money Transfers: Total money transfers are the cumulative value across the respective period of user deposits, withdrawals, and cross-currency trade funding via eToro Money IBAN.

Trades: Trades represent the total number of orders that were placed by users and executed during the applicable period. Trades include self-directed and copy trades, and each trade reflects either the opening or closing of a position by a user.

Invested amount per trade: The total invested amount divided by the total number of trades. For reporting purposes, we present this measure separately for capital markets (equities, commodities, and currencies) and for cryptoassets, in order to highlight trends across the two categories, given their unique characteristics.

About eToro

[eToro](#) is the trading and investing platform that empowers you to invest, share and learn.
